

FBIS Administrative Staff Log Notes - 14 July 1967 (Continued)

25X1 2. Reference [] letter of 28 June 1968, Subject: Applicant Information
25X1 Forms. Following up on the conversation between [] and
myself as to whether [] Class A contract personnel should or could be
exempted from the polygraph we contacted Security for definitive statements on
Class A and Class B type clearances and whether Class A contract personnel could
be exempt from the polygraph. The Office of Security statements follow:

Class A - Class A contract personnel are investigated for full
clearance through top secret. They must be polygraphed
and no exception may be made. All U.S. citizen contract
employees should have Class A clearance.

Class B - Employees given Class B contracts are subjected to the
same clearance procedures that personnel are who are
cleared for access to material through secret, i.e.
provisional clearance. They may be witting or unwitting.
Notwithstanding the fact that a person may be "cleared
through secret," which is simply a clearance term, he may
have no access to classified material nor to the areas
in which it is kept.

This type of clearance is reserved for non-U.S. citizens
and for those citizens who cannot qualify for full staff
employment, i.e. married to an alien, less than five years
as a U.S. citizen, and other limiting factors, but whose
qualifications are unique and, therefore, necessary.
